

## **Re: Invitation to provide Medicaid Services for Optum/UnitedHealthcare® Community Plan of Georgia**

Optum, operating under the brand United Behavioral Health in partnership with its affiliate, UnitedHealthcare® Community Plan of Georgia, is excited to announce that we intend to apply for the Georgia Families 360 plan (referred to as “Georgia Medicaid”) request for proposals, which would allow us to offer Georgia Medicaid in your area. In preparation, we are inviting you to join the care provider network we are building to serve Georgia Medicaid members.

### **What is the Optum Community Plan Medicaid Network?**

As an Optum participating behavioral health provider, you'll join a network of hospitals, physicians and other care providers who share our commitment to serving economically disadvantaged and medically underserved populations.

### **How to participate**

To participate in the Optum Medicaid network, please visit provider express at [Our Network \(providerexpress.com\)](https://providerexpress.com). Please select individual, group, or facility and complete the application.

### **Important Reminder regarding Medicaid enrollment**

All health care professionals and facilities must hold a current Georgia Medicaid ID number and be credentialed by the Georgia Department of Community Health Care Management Organization process to provide services to Georgia Medicaid members. If you haven't submitted an application, you may submit a joint application at [mmis.georgia.gov](https://mmis.georgia.gov) > Provider Enrollment > Enrollment Wizard > Provider Enrollment Application

### **We're here to help**

We look forward to developing a relationship with you and your practice. For more information, please call the Provider Service Line at 1-877-614-0484.

Sincerely,

Erin Cummings  
Regional Director Network Contracting, SE Region
